Citizen Deliberation | Climate Action | The EU's Green Deal

**COMING
SOON**

Online Training Course on Citizen Deliberation and the Green Deal for VET Educators in Agriculture and Engineering

Our innovative Online Training Course for VET educators and students will be available soon! The course aims to enhance the awareness of VET educators and students of Engineering and Agriculture on environmental issues specific to their field. It will provide methodologies and resources for engagement in knowledge-sharing, democratic discussions, and Socratic seminars about policies and practices that can minimize ecological footprints.

Exciting news! Our training program is almost ready for its pilot testing!

We are excited to announce that we will be conducting two pilot testing activities to ensure the effectiveness and quality of the training program. The first is planned for the coming June when the program will be tested by VET educators. Their feedback and suggestions will help us refine the program and make it more effective, as a tool for teaching in the vocational education and training sector.

The second pilot testing will take place in September, where the program will be tested by engineering and agricultural students. Their feedback will help us tailor the program to the needs of the students in these fields and ensure it meets their specific needs.

Stay Tuned!

In our next newsletter in July, we will present the finalized Online Training Course and the results of the first pilot testing!

Don't miss the announcement of our next and final Project Result as this wonderful initiative slowly completes its objectives.

The Rest is up to you!
